E-Registrar DB is held by a separate third party, populated by the manufacturer(s), and then by the reseller(s). Only the purchaser ID needs to be passed as the E-Registrar already has the purchaser data.

file://C:\My Documents\E-Registrar2.gif

Manufacturer has the E-Registrar DB but the communication from the purchaser is direct. Reseller tells manufacturer asset has been sold.

file://C:\My Documents\E-Registrar3.gif

Web store is also the manufacturer and E-Registrar.
